

### S333 - A Message about Slavery

A few days ago some of your newspapers contained reports of workers committing suicide at an electronics factory in China, where some of the world's newest and most popular gadgets are made, and I wanted to comment on this issue.

When products are designed and put into production, it is the fashion to make them in countries like China where wage costs are a fraction of the value of the USA and Europe, and the company which designs and sells the product can make truly vast profits from such activities.

The Chinese workers are kept in conditions which would be regarded as slave-like in the USA and Europe, and they are forced to work long hours in sub-standard conditions by Western standards. Suicide became the way out for some of them, and the company has spent money on anti-suicide measures, but not on improving conditions for the workers.

They don't have to work there and can always quit, but such are the family pressures for money, and a long queue of people waiting for these jobs, that they feel obliged to work there. They are trapped in appalling conditions, and some of them see suicide as their only way out of it; should you care, and if so, why?

The Spiritual Hierarchy are in the process of a system which will remove all of the Dark Elite from your dimension and clear up all of the pollution, which will enable you ones to begin constructing a new civilisation, and slavery of whatever kind has no place in it, by Divine Decree.

To us it is profoundly astonishing that a citizen of your world who understands the appalling conditions that some workers are kept in, will still go and purchase one of the electronic items made by them; as this is tantamount to assisting the bosses in their system of financial slavery. All of the products are thus tainted, and yet you ones still buy them; which says a great deal about your priorities. It is often regarded as not the problem of the purchaser if a producer resorts to economic slavery to make a product and obtain vast profits due to greed; it's simply Capitalism.

Well my friends it is much more than that, because any form of slavery turns your civilisation into a weedy and sick dysfunctional little thing. There have been civilisations before on your planet which were finished off due to greed, corruption and vice and in many ways your present one is no better, as these symptoms of a failing society are all around you if you will only look at them.

There is no valid reason for any form of slavery to exist in your world, whether that involves the slave ships which took poor people from Africa to the West Indies in appalling conditions to work in the plantations, or the economic slavery we see in India, Africa, China and many other countries. It is unfair and cruel, and does nothing to advance your civilisation to the point where it becomes a truly Galactic society.

There are a great many inhabited planets in the Grand Universe and whereas you ones think you are an advanced society, I am here to tell you that you are no such thing; for you are one of the most backward. Any planet with War and Slavery on its' surface can be seen for what it really is by the many other beings in Creation, and in your case this is very backward. They just don't understand why you want to kill, rob, maim, torture, cheat, and abuse your fellow men and women, and neither do the Spiritual Hierarchy.

We understand that you do it because many of you don't know any better, but the very worst offenders are the ones who run your governments, banks and corporations, and these dark methods trickle down to all levels of your society, where many of you see them as 'the right thing to do'.

Your prisons don't hold your biggest crooks, only those down the bottom end who got caught, prosecuted and convicted. All of the really big crooks are in the establishment of the government and political system, banking and finance, armed forces, corporations, freemasonry, media, charitable organisations, religions, police, universities and many other groups besides. They tell you one thing and actually do something else; they take your money at every opportunity and tell you that you are free and live in a democracy, and most of you believe them for isn't that how the world is?

Well, yes it is, but only because it was rigged up that way by the crooks and thugs. Your democracies are just a façade, for a very slick way of making money out of you and letting you think you are free; but you are not. It doesn't have to be that way and the opportunity to take control of it and steer it in an altogether different and more spiritual direction is fast approaching. Are you ready for it, or have you been so brainwashed that you fail to see the truth which is out there for all to see? Think about it, investigate it; but above all don't just sit there and accept the current system as the only option.

I am S333 of the Spiritual Hierarchy giving you these words telepathically through Vince. 14<sup>th</sup> June 2010
