Community

“Community is important to me because school life is like living in a community. If you’re not part of a group in the community (friends) then you might not enjoy it which then might mean that you won’t work as well as you could.”

“Without the teachers and students working together we wouldn’t have a community and nobody would get anywhere in life.”

“Community is important because we can work as a team to succeed and help the community.”

Values**

Community

“Community means when you are loyal to others in a community.”

“To me community means it is built up strong by the people in it – there is good teamwork and pride in it.”

“To be able to live in a community with other people is important. I think it is also important to live your life with rules and maintain honour, respect and integrity. This is one of my rules.”
