

BLAISE
Site Solutions

CCTV

Blaise Site Solutions offer a wide range of both hardwired & wireless battery operated CCTV Systems. With the latest infrared technology our systems can work during the evening bringing images up to daylight level. All our systems are designed and installed to adapt to the requirements of the construction industry.

Man Guarding, Key Holding and Emergency Response

To complement our full product range we offer 24hour site monitoring, a flexible key holder package that can work in conjunction with CCTV or Wireless fire alarm systems. Emergency call out options and full Man Guard solutions are also available.

£400 million a year,
that's the cost to the UK construction industry from theft, vandalism and arson.*

Blaise Site Solutions is a UK based security company that provides tailor made, state of the art innovative security solutions for the construction industry including CCTV systems, wireless fire protection, access control and intruder alarms through to comprehensive security packages for any budget.

Blaise Site Solutions is committed to providing customers with more sophisticated solutions to more complex problems.

Site Communication

IT & telecoms are part of our extensive range of products and services that are designed to make it easy for our customers to set up and run a site more easily and more efficiently.

Access Control

Access Control has proven an essential part of the construction industry and Blaise offer various access control systems including Biometrics, Thumb Readers, Proximity Fobs and Swipe Cards. Access Control Systems have the ability to not only let authorised personnel into secure locations, but also giving you the ability to stop people entering unauthorised areas.

Fire Protection

Our Wireless Fire system is remotely monitored by our control station. Blaise offer a flexible range of wireless Fire alarm systems that are suitable for any construction site. The Fire system is also capable of monitoring other wireless devices including Gas detectors, Medical help points, water detection and Intruder alarms.
