Job Vacancy: Draughtsperson

Established in 1993 European Roofing Systems (ERS) specialises in working in partnership with large Construction Companies to resolve complex challenges in their chosen market sectors.

ERS has now developed a proven reputation to give roof and wall cladding specification proposals to a range of challenging contracts. These include roof coverings using secret fix standing seam systems, composite metal panels and single ply membrane projects. Our experience of external wall coverings includes composite panels, bi-modular panels, louvered, sinusoidal and trapezoid profiles. ERS is an approved contractor for rainscreen applications of ceramic and metal, including copper and zinc, and also provide a gutter design service integrated with conventional or siphonic rainwater pipework.

ERS is looking for a motivated person, who has the ability to work unsupervised, with a minimum of 5 years proven experience of different facade and roofing systems. Duties will include the production of layouts, detailed drawings, material scheduling, coordination of projects with our Contracts Department and representing ERS at client meetings. An ability to meet target programmes is essential.

The candidate will be fully competent in the use of Autocad software and Microsoft Office. Experience in being able to use our in-house Tekla modelling software would be beneficial.

A detailed C.V. with a covering letter is required in the first instance addressed to:

Sharon Rowley
