

CLOSED CIRCUIT TELEVISION

Secure Alarms deliver CCTV security solutions

CCTV - THE EYE THAT NEVER SLEEPS

CCTV systems are no longer considered an expensive, luxury item. They are now a reasonable price and a good investment, particularly for unoccupied properties. When viewing cameras during the day, businesses can pre-empt losses, assist in the arrest of thieves, confront staff pilfering and capture people intent on vandalism. Businesses and home owners can record events while they are away and view upon their return. Secure Alarms can also set up remote viewing via a computer. Simply put, CCTV cameras allow you to see who did what and when!

DON'T TAKE THE RISK... ENSURE YOUR SECURITY WITH OUR CCTV SYSTEMS

SECURE ALARMS

We design and install CCTV systems to the NSI (National Security Inspectorate) 'Nacoss Gold Code of Practice NCP 104 for the Planning, Installation and Maintenance of CCTV systems' to European Standard EN 50132-7

ACCREDITATION

Secure Alarms are accredited to the **NSI Gold Standard**. Choosing a **NSI** approved company ensures workmanship to the highest recognised industry standard, as demanded by the Police and Insurers. We are also certified to ISO 9000 Quality Assurance.

Secure Alarms deliver **CCTV security solutions**. When choosing a CCTV system, it is of crucial importance not to compromise on quality or

choice of company to carry out the work. The quality of the system determines the resulting evidential image.

Secure Alarms are pleased to carry out a full site survey **at no cost to you**. Our team has the knowledge and proven experience to review your property effectively and recommend an appropriate system tailored to your needs.

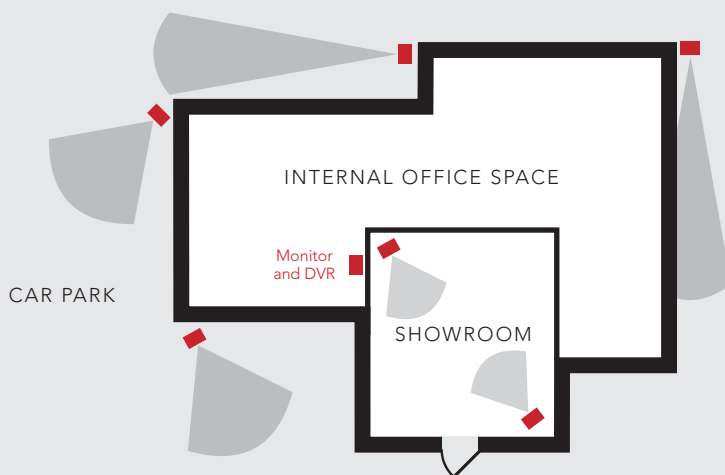

AN EFFECTIVE DETERRENT

CCTV is accepted as being a highly effective deterrent to crime. It discourages anti-social behaviour, vandalism and theft. CCTV is the ideal solution for many businesses and residential properties.
